

PETROVIETNAM

CCOP COUNTRY PRESENTATION

**Presented by:
Pham Duc Thang and Ngo Van Hung**

2013

CONTENS

- **Status of CCS-related activities**
- **Potential geological storage of CO₂**
- **Future plan**

STATUS OF CCS-RELATED ACTIVITIES

- **Preliminary research about CO2:**
 - **CO2 source site research: power plants, oil fields.**
 - **CO2 injection for enhanced oil recovery: finished pilot in house study in the first phase and continue to apply for one specific oil field in the second phase.**

Potential geological storage of CO2

- **Onshore mature fields.**
- **Offshore mature fields for EOR/Storage.**
- **Onshore Pre-cenozoic structures (???)**
- **Tanker building plans for CCS in the north, middle and south of Vietnam.**

FUTURE PLAN

- **Approval by government for CCS policy.**
- **Preparation humane resource for CCS projects through training, workshops, seminars, projects.**
- **Cooperation with member countries of CCOP family and others.**
- **Priority applying of CCS for main projects.**
- **Apply for large scale.**

Recommendation

- **Be continued participate in CCS technical workshop in the near future that hold by CCOP.**
- **Working with member countries to learn experiences**

**THANK YOU FOR YOUR
ATTENTION!**
