# CCOP PUBLICATION CATALOGUE

## PROCEEDINGS OF CCOP ANNUAL SESSION :-

**PART I** – General or business proceedings, summarize discussions and deliberations of representatives from member and cooperating countries/organizations of CCOP on projects and geoscientific activities for regional development. These CCOP proceedings are available backdated since the 1<sup>st</sup> CCOP Proceedings in 1967 up to present.

**PART II** – Technical proceedings are collections of selected technical papers presented at the annual session. These technical reports professionally record notes and findings on current geological research and development as well as resources exploration along offshore and coastal areas in the fields of oil and gas, mineral resources, coastal zone management and geo-hazards in East and Southeast Asian region covering wide interest of CCOP member countries and international societies as well.

## TECHNICAL BULLETIN :-

The Technical Bulletin series first came out in 1968. The publications are regularly published by the Geological Survey of Japan as an “in-kind” contribution to CCOP. These publications usually record on geology, and geophysics and paleontology of East and Southeast Asia, which are more comprehensive reports than those prepared for presentation at the annual sessions.

## TECHNICAL PUBLICATION :-

This is a series of publications commonly examining a specific perspective in more depth than those of other series of publication. The proceedings/reports/papers of major and remarkable CCOP workshops and seminars are also recorded in this series.

## CCOP NEWSLETTER :-

The Newsletter was first issued in 1974 and has been quarterly published since then.

The purposes of the Newsletter are:

- to keep abreast of the information of CCOP concerns and interest;
- to disseminate information of CCOP activities and projects implemented and to be implemented to member and cooperating countries;
- to act as a medium to link CCOP to outer world or other related fields;
- to publish in short scientific notes, discoveries and fact findings.

Contents include CCOP and related news and programmes, exchange of information, a forum for publicizing academic/non-profit making activities and publications, snippets of news; regionally and internationally, scientific notes and condensed technical reports and seminars.

### **CCOP MAP SERIES :-**

After decades of geological/geophysical survey for member countries, CCOP started regional geoscientific map compilation from middle 1980s upon the needs of member states as well as international communities while basic data were available for the purpose.

### **CD-ROM SERIES :-**

With the rapid development of computer technology, in particular the wide application of GIS system, CCOP decided to digitize maps using PC Arc/Info. The accumulation of digital data has prompted CCOP to use Compact Disc. As a read-only medium, CDs allow recording large amounts of information in a reliable and economic manner.

### **CLASSIFIED INDEX OF CCOP PUBLICATIONS :-**

This is the reference handbook to both printed, namely quarterly newsletter, proceedings of CCOP annual session, technical bulletin and technical publication series; and non-printed publications such as periodic progress report on specific programme activities, proceedings of training workshops/seminars/symposia, reports on the consultancy/ advisory missions commissioned by technical experts and reports on the findings and recommendations of ad hoc missions.
